

**PROFI  
WELDERS**

**Profi steel holding s.r.o.** brings together professionals with **many years of experience** in the field of execution, maintenance and reconstruction of complex technological units as well as individual machines and equipment used in the **energy, petrochemical, pharmaceutical and food industries.**

**Our company Profi Welders s.r.o** closely cooperates with **Profi steel holding s.r.o..** We specialize in the above fields and provision of qualified personnel.

## MAIN ACTIVITIES

**Production and assembly** – production, supply, installation of pressure and non-pressure piping systems, superheaters, economizers, condensers, supporting and auxiliary structures, etc.

**Maintenance, overhaul and installation of energy equipment** – piping systems, overhauls of boilers, installation and maintenance of machine parts, heat exchanger stations, etc.

**Management of activities** – ensuring the management of project activities directly on the construction site. These activities include the overall organization of on-site activities such as material management, manpower planning, prefabrication in the workshop, assembly and disassembly activities, commissioning.

### Our services include mainly:

- **comprehensive welding works** – performed by qualified and experienced welders with rich experience and skilled in various types of assembly, production activities and all types of welding methods, including orbital welding.
- **professional piping works** – carried out by trained and experienced pipefitters and helpers who understand isometric drawings, technical drawings and other necessary documentation needed to perform assembly and disassembly works.
- **NDT inspections** – execution of Non-destructive testing in range of visual testing, liquid penetrant, radiographic, PMI by qualified personnel.
- **ATD and AB** – completion of accompanying technical documentation and as-built documentation
- **Pressure test performance** – water / air according to client's requirements or as a part of the works

The quality of our services and know-how in this area is known to our customers all over the European Union. We already work with more than 40 companies and the number of assembly hours in recent years exceeds 900,000 hours per year.

**PROFI  
WELDERS**

**YOUR SOLUTION  
FOR QUALIFIED PERSONNEL**

With more than 14,000 registered workers in our database, we are ready to address the shortage of qualified staff in your projects.

We actively work every day to find and train new workers. We regularly update and expand our database and portfolio of workers, so our clients are provided with the best.

**We have our own training centre for welders and pipefitters for all welding and assembly works according to European standards. You can monitor the progress of exams online via cameras from the comfort of your office.**

We use our own technological machines and equipment to carry out installation and assembly works.

An individual approach is a matter of course. We provide staff only with the required experience. Mandatory skill test before leaving + support during the performance of works (e.g., increase the number of staff, exchange of staff as needed, etc.).

**Goal-oriented mindset, personal approach, taking the initiative in solving client problems and taking responsibility for the proposed solutions is the philosophy of our company and all members of our team stick by.**
